

DANIEL PUSTOTIN

DEVELOPER

PROFESSIONAL CAREER

QA-Engineer

GS-Soft (mid 2019- mid 2021)

Full-stack development

Primarily automated testing and QA-Engineering

Stack: JIRA, git, Smart SVN, Delphi, JS/TS, Karma and Jasmine.

iOS-development courses mentor

Skillbox (mid 2021 till now)

Homework reviews and mentoring

iOS-development courses creator

Skillbox (late 2021 till now)

Improvements for existing courses

Creating tasks and theory long reads for students

PERSONAL PROFILE

I started learning programming ten years ago in school. Every day I grow up and improve my skills. I have experience in QA-Engineering and automatic testing and iOS development.

I try to follow the latest technologies and use them in my pet-projects. Without doubt, my competitive programming experience helps me a lot in any kind of work.

SKILLS

Technologies

Git, Smart SVN, JIRA, Figma

Programming Languages

Swift + Objective-C, C++, JS/TS

iOS-development

SwiftUI, UIKit, Storyboard

Bond, RxSwift

Alamofire

Realm, CoreData, UserDefaults

SpriteKit

Design patterns

Unit/UI Testing

Asynchronous programming

AWARDS & ACHIEVEMENTS

- Semifinalist - ICPC 2020
- HashCode 2021 (top-30%)
- Reply Challenge 2021 (#105 of 1923)

ACADEMIC HISTORY

Higher School of Economics

Bachelor Computer Science 2019 - 2024

Applied Mathematics and Computer Science

ABOUT ME

Hi, my name is Daniel, and I am 19 y.o.

I have been learning programming since I was a kid. Solving complex and unordinarily problems always attracted me. That is my passion. I cannot imagine my everyday life without trying out something new in my developer's career.

I love to lead the development process and control my teammates to follow the plan. Likewise, I am kind of perfectionist at this point. Everything should be done right and that is the only one possible option for me.

My dream is to create an innovative and revolutionary product. That must be my masterpiece.
